### **Tiger team**

A Tiger team is a team of individuals who are specialists in a specific area of work and who are brought together by an organization to work on developing an action plan for a specific problem, critical situation or challenge faced by it.

### **SWAT team**

In contrast, a SWAT team is a group of individuals that work to enact a plan or solution developed by a company's tiger team.

Thus tiger team takes a first pass to identify procedures, and the SWAT team assesses their feasibility and recommends adjustments. Both manage different functions of planning for and responding to crises situations and each require a specific skill set.
